

EaseWork

Problem Statement

Employees and HR struggle with scattered tools for attendance, leave tracking, HR documents, performance, and task management, leading to inefficiency and productivity loss.

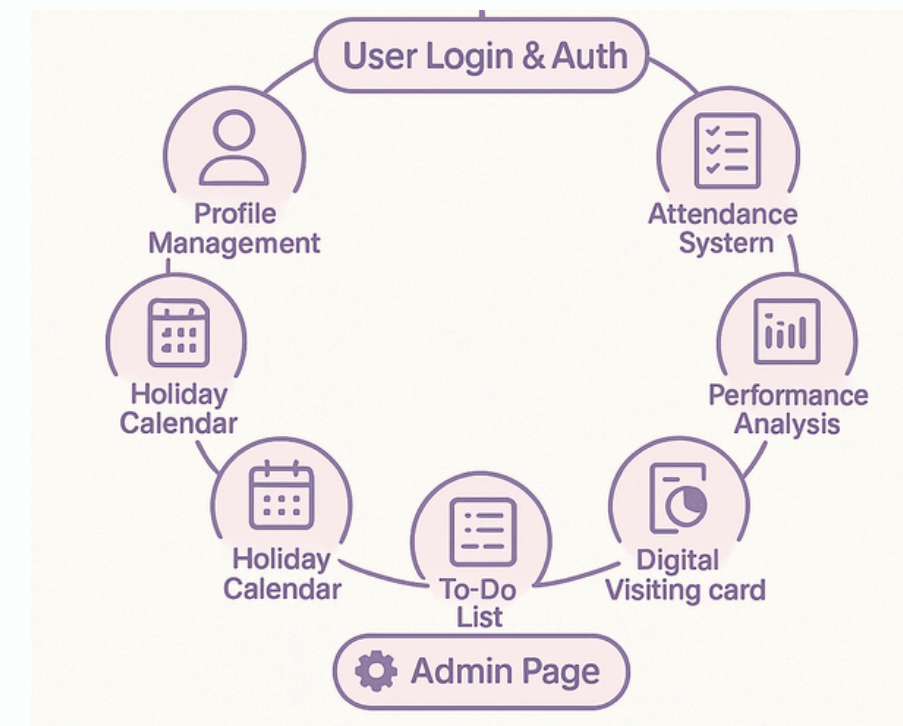

Architecture/Block Diagram

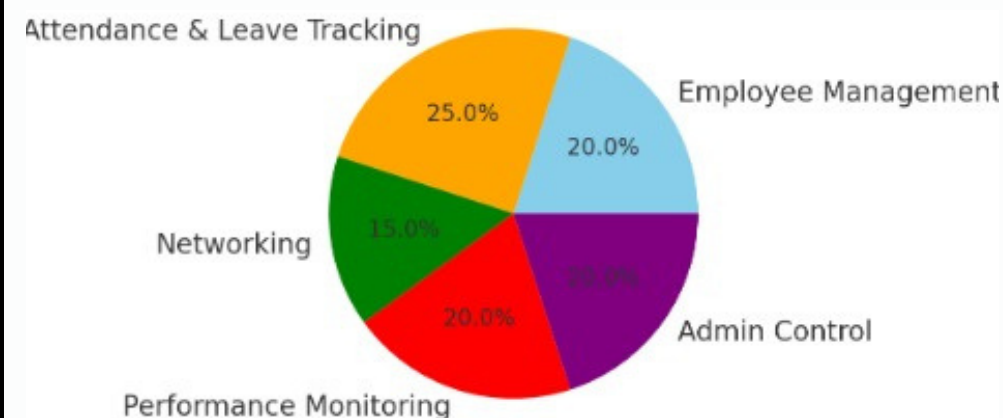

Objectives

Employee Management: Secure logins and personalized profiles.
Attendance & Leave Tracking: Streamlined attendance, leave requests, and holiday calendar.
Networking: Digital visiting cards with QR codes for seamless contact exchange.
Performance Management: Document uploads, task tracking, and To-Do lists.

Work Flow

Results

Employee Management: Simplifies logins and profiles.
Attendance & Leave: Automates tracking and approvals.
Networking: Quick contact sharing via QR codes.
Performance Monitoring: Manages documents and tasks.
Admin Control: Centralized management dashboard.

Key References

Books: Designing the User Interface by Ben Shneiderman (UI/UX), Websites: MDN Web Docs, W3Schools for coding & development, Stack Overflow for troubleshooting & discussions.

Conclusion

The project streamlines employee management, attendance, leave tracking, networking, and performance monitoring with a centralized admin dashboard, enhancing efficiency and productivity.
